# APEX HAS BEEN PROVIDING TOWER AND WIRELESS DESIGN AND CONSTRUCTION SERVICES TO SOME OF THE LEADING COMMUNICATIONS COMPANIES FOR MORE THAN TEN YEARS.

## THE HIGHLIGHTS OF OUR VALUE PROPOSITION ARE SUMMARIZED BELOW:

- COMPETITIVE PRICING WITH QUALITY RESULTS
- EXTENSIVE EXPERIENCE AND SUCCESS
- CONTINUOUS PROCESS IMPROVEMENT
- PROJECT METRICS AND REPORTING

Apex, is a global Engineering firm headquartered in Herndon, VA with over 25 years of providing engineering services to customers worldwide.

Our Team is well qualified with a professional staff with many years of experience delivering complete Tower and Wireless solutions from 100,000 seat arenas demanding high capacity coverage to urban retrofits. Our Team is able to customize solutions for any environment.

Our Group has completed over 1,500 successful Tower and Wireless projects for customers such as AT&T, Verizon, and T-Mobile.

## IT'S ALL ABOUT THE DATA!

### ENGINEERING

Whether tackling massive coverage areas or congested signals environments, our Group makes the daunting doable. Utilizing sophisticated modeling, our engineers and mapping team target the problems and help customers visualize the solutions.

### DAS & SMALL CELL

Densely populated areas can experience download overload. DAS and Small Cell solutions fix connectivity issues in large spaces. We help customers determine an appropriate solution based on space and capacity.

### CONSTRUCTION

Evolution in infrastructure, transmission, and reception require construction that is solid, but flexible for future needs. Our Group fulfills that demand. Valuing quality and efficiency ensuring success at every stage.

### PROFICIENCIES

Our Group is proficient in Design, Installation and Testing. Our expertise includes Professional Land Surveying, Geotechnical Services, Lease Exhibits, Construction Drawings, Structural Mappings, Post Modification Inspections, Structural and Mount Analysis, Mount Certifications, and PE Stamps in 48 states in the USA.

### TECHNICAL EXPERTS

Our technicians, engineers and project managers quickly deliver affordable solutions with amazing agility and quality

### SKILLED AT SYSTEM INTEGRATION

Adept at streamlining complex workflow processes and quality control programs as well as customizing legacy systems for integration with new technology.

### EFFECTIVE MAINTENANCE SUPPORT

We ensure that all network components are fully functional and maintain backend systems and field assets. Our Team can also incorporate the customer's GIS data and design workflow as well as perform data verification and purification.

### ALWAYS ON BUDGET AND ON PLAN

We avoid project setbacks and delays by securing the financial and human capital before the project begins using established and tested business processes and tools to carefully manage the resources throughout the project.
